

José Ignacio Carpanzano

TECHNICAL PROJECT MANAGER | DEVSECOPS & AI ARCHITECT

Río Cuarto, Córdoba, AR • +54 9 358 5484876 • CARPANZANOJOSE@GMAIL.COM
GitHub: [iota-sigma-dev](#) • LinkedIn: [jose-i-carpanzano](#)

Cybersecurity Architect and Technical Project Manager with over 15 years of experience in high-stakes environments. Transitioned from traditional InfoSec into **AI-Augmented SDLC Architecture** and **DevSecOps**. Proven expertise in engineering Zero-Trust network perimeters, orchestrating immutable infrastructures, and deploying autonomous AI-driven ecosystems. I specialize in scaling security without blocking business agility, blending offensive intelligence with robust architectural defense.

Cybersecurity specialist with a strong technical background and experience in incident management, risk and vulnerability assessment, system administration in Linux and Windows environments, and information security consulting. Currently working independently as an advisor/consultant in INFOSEC Engineering and Architecture. I have worked for major companies such as General Motors, Hewlett Packard, and Electronic Data Systems in global, multicultural roles where I led IT security projects and infrastructure migrations. I have expertise in security operations, identity management (IAM), cloud security, and ethical hacking.

CORE COMPETENCIES & SKILLS

LangChain & n8n

DevSecOps & Shift-Left

Cloudflare Zero-Trust

CrowdSec IDS/IPS

Docker Swarm & Kubernetes

Next.js 15 & Hono

Qdrant & pgvector

Prisma RLS

AWS & Azure

Terraform

Linux (Solaris, HP-UX, AIX)

Windows Server & Active Directory

Ethical Hacking / HTB

ZAP Proxy & Burp Suite

Forensic Computing

IAM & OAuth

Python / Bash / C++ / PHP

MySQL

Semgrep & Gitleaks

ISO 27001 & NIST 800-53

HIPAA, CCPA, GDPR

- OPERATING SYSTEMS & PLATFORMS:** Proficient and experienced with UNIX/LINUX variants (Solaris, HP-UX, AIX) and Microsoft platforms (Windows Server, Active Directory).
- NETWORKING & SECURITY:** Strong understanding of network fundamentals, including protocols (DNS, DHCP), VPNs, and TCP/IP. Skilled in firewall management, intrusion detection, and network scanning tools (ZAP Proxy, Burp Suite). Knowledgeable in conducting various attacks (DoS/DDoS, SQL injection, XSS) and implementing countermeasures.
- CLOUD SECURITY & INFRASTRUCTURE:** Practical experience securing cloud environments (Azure, AWS) with focus on IAM, workload protection, and compliance. Skilled in applying NIST CSF and NIST 800-53 security controls to cloud and hybrid infrastructures. Experience designing security architectures for cloud-native applications, including containerized workloads in Docker and Kubernetes. Proficient in Terraform for automated provisioning and policy enforcement.
- PROGRAMMING & SCRIPTING:** Proficient in C++, Python, PHP, and Bash scripting. Experience with automation tools and libraries for system administration and security tasks.
- DATABASE MANAGEMENT:** Experienced in MySQL administration and SQL language for data manipulation. Competent in database modeling and optimization techniques.
- INFORMATION SECURITY & COMPLIANCE:** Proficient in ethical hacking methodologies: reconnaissance, vulnerability assessment, and exploitation. Solid background with SGSI implementation and ISO/IEC 27001. Deep understanding and hands-on experience with regulatory frameworks including HIPAA, CCPA, and GDPR, ensuring secure data handling and privacy compliance. Knowledgeable in cryptography, blockchain, and secure application development.
- FORENSIC COMPUTING:** Skilled in forensic analysis tools and techniques for digital evidence investigation. Experience in data acquisition, chain of custody, and forensic reporting for legal proceedings.
- MOBILE SECURITY & WEB APPLICATION TESTING:** Familiarity with mobile architectures and security vulnerabilities. Experience in web application testing with tools like ZAP Proxy and Burp Suite, including spider web crawling for vulnerability identification.

PROFESSIONAL EXPERIENCE

DevSecOps Architect & INFOSEC Specialist (Independent)		2017 – Present
Evolved from Information Security consulting to full-stack infrastructure engineering, orchestrating complex, agent-driven SaaS platforms and enforcing Zero-Trust governance.		
- Engineered autonomous AI-driven ecosystems utilizing LangChain and n8n, integrating vector databases for semantic search and Retrieval-Augmented Generation (RAG). - Architected immutable CI/CD pipelines with integrated Shift-Left security (Semgrep, Gitleaks) and orchestrated container deployments via Docker Swarm and Turborepo. - Designed Zero-Trust perimeters using Cloudflare Tunnels, resolving complex Linux kernel network race conditions (Systemd FreeBind), and deploying CrowdSec for kernel-level L7 mitigation. - Conducted security assessments, vulnerability management, and regulatory compliance consulting (ISO 27001, NIST) for various enterprise clients.		
OrderKill: High-Performance B2B SaaS LangChain CoWorker		
DiveSync: Scuba Operations SaaS Predictive Autoscaler Zero-Trust		
Striker: Modular Pentest TUI Orchestrator AsyncIO Red Team OPSEC		
Autonomous Ecosystems: Academic / Barbarroja / Casado_Prop n8n RAG Architecture		
Technical Security Consultant	General Motors	2013 – 2015
- Managed global Identity and Access Management (IAM) lifecycles, significantly reducing unauthorized access incidents and ensuring strict compliance with internal security policies. - Administered mission-critical Windows and Linux server infrastructures, specializing in LDAP integration, Active Directory hardening, and Group Policy Object (GPO) deployment. - Participated directly in the strategic implementation and internal auditing of ISO 27001 and NIST 800-53 security frameworks across global manufacturing and corporate operations.		
System Analyst and Technical IAM Consultant	Hewlett Packard / Electronic Data Systems	2009 – 2013
- Managed complex security access controls, system audits, and strict compliance enforcement in heterogeneous, large-scale UNIX/Linux (Solaris, HP-UX, AIX) and Microsoft enterprise environments. - Provided tier-3 engineering support for critical server operations, ensuring 99.9% uptime and adherence to SOX (Sarbanes-Oxley) and other stringent regulatory standards. - Streamlined user provisioning processes and conducted regular vulnerability assessments to maintain robust infrastructure integrity.		
Technical Support	Net Desarrollos	2007 – 2008
- Managed remote Linux and Windows servers, optimized network configurations, and provided advanced technical support for proprietary real estate management software. - Implemented automated backup solutions and enhanced system monitoring to ensure data availability and rapid incident response.		
IT Infrastructure Supervisor	Arquinec-Southlat	2007
- Engineered and installed the core IT infrastructure for a high-volume contact center, including VoIP systems, structured cabling, and network routing. - Delivered Tier-2 technical support, minimizing agent downtime and optimizing overall network performance.		

EDUCATION

- Computer Engineering** (Up to 4th year)
FCeFyN, U.N.C.
- Specialization in Cybersecurity**
Educación IT (283 hours)
- Diploma in Electronics & Electrician**
Aeronautical Orientation

KEY CERTIFICATIONS

- Hack The Box:** Top 5% Global (119 targets)
- Educación IT:** IT Security Specialist, Ethical Hacker
- Microsoft:** Certified Professional (MCP)
- Security Blue Team:** Vulnerability Mgmt, OSINT
- Maltego & Basel Institute:** Cybercrime & OSINT
- arcX:** Cyber Threat Intelligence Analyst
